

Park District of Highland Park
ADA Transition Plan
June 2019

## Introduction and Background

The Park District of Highland Park (PDHP) strives to provide accessible recreation programs, facilities, and parks for all users and visitors.

Th District's efforts are supported by the Federal Americans with Disability Act (ADA). Title II of the ADA became effective in 1992. Title II prohibits units of local government from discrimination on the basis of disability in the delivery of programs and services. Title II uses the program access test to evaluate accessibility. The program access test requires that at least one of each amenity or program must be accessible with relatively similar ease to all the District. The Federal Government and State of Illinois have both published enforceable standards that provide guidelines to define accessibility for the built environment. The latest federal standards were approved in 2010 and include recreational facilities including playgrounds and fishing piers. The latest Illinois standards were approved in 2018.

In 2010 the District hired Recreation Accessibility Consultants (RAC) to complete a report with recommendations to the District for the transition plan. RAC audited all Park District parks and facilities to identify barriers. RAC assessed PDHP facilities and parks using the requirements from the Title II effective in 1992 and amended in 2010. RAC used the Illinois Accessibility code when it was more stringent than the federal code.

## Outcomes:

- 2,251 access deficits were identified in the 2010 audit report.
- RAC highlighted common issues that could be rectified by training maintenance staff, regular inspections, policy updates, and districtwide facility modifications.
- RAC provided maps identifying specific location recommendations based on the 2010 capital plan and existing level of service
- RAC provided a report for each facility and park

In 2011 RAC was hired to complete the transition plan. The transition plan phases the recommendations identified in the audit.

In 2013, Cordogan Clarke \& Associates Inc. (CCA) was hired for the modification of the transition plan to provide a more economical way to accomplish the ADA improvements including modified transition plan phasing and cost estimates. The firm also provided future planning tools to evaluate the transition plan.

## NSSRA

The focus of the transition plan and audit reports is on the Park Districts physical properties. The Park District is committed to both accessible properties and programs. To offer recreational programs for all users the District is a member of the North Shore Special Recreation District. PDHP residents can register for programs through NSSRA or work with NSSRA and PDHP staff to make access accommodations.

## The Plan

Since 2010, the Park District has corrected barriers identified through the audit and made accessibility improvements throughout the District. The District's approach is to ensure that all new projects consider accessibility. The Park District's transition plan is updated annual to reflect accomplishments and prioritizes remaining barriers to inform future planning.

The plan uses the 2010 audit as a foundation and the planning tools provided by CCA as planning guides. The plan includes barriers to accessibility and the corrective action recommended, status of that corrective action, prioritization, and estimate year of completion.

## Guiding Principles:

The District follows the recommendations of the RAC and CCA.

- The District seeks to achieve the program access test following Title II of the ADA.
- The District seeks to achieve at minimum accessibility for 1 out every 3 park elements (i.e. playground) to provide increased accessibility throughout the District.

## How to read the plan

The plan contains a list of all corrective actions recommended from the initial audit, Each action is assigned a status from the list below.

Accomplished: The means that the recommended corrective action has been accomplished.
Planning: The corrective action is to be addressed through a project budgeted in the District's five-year capital plan, planned as part of the District's replacement schedule, or other internal efforts.

Ongoing: The corrective action refers to an action that is addressed through ongoing maintenance. District staff managing maintenance of parks and facilities have been trained in accessibility design standards.

Leave as is: The corrective action was either addressed through the accomplishment of another District effort, the area is employee only at this time, or the recommendation would be burdensome or unfeasible due to the existing conditions.

No longer applicable: The building or amenity addressed by the recommend corrective action no longer exists.

To be considered with next update: The corrective action has not yet been addressed but has been assigned a priority and will be evaluated during capital planning.

## Prioritization

The recommended corrective actions with the status "To be considered with next update" have been prioritized. The prioritization system was guided by the tools developed by CCA. There are three priority levels 1, 2, and 3.

Priority 1: Corrective actions assigned priority one address areas that serve the most users. These include community parks and facilities. Other assigned priority one are unique elements within the District where only one of the activity can be found or elements that do not mean the 1 out of every 3 rule.

Priority 2: Corrective actions assigned priority two address neighborhood parks.
Priority 3: Corrective actions assigned priority three address employee only areas, passive unprogrammed parks, and lesser utilized elements that can be found within the District at accessible locations.

## Future Planning and Commitment

The transition plan will be posted on the Park District Website and is reviewed and updated annually. The plan is used as a tool to inform capital planning efforts and scope development for future projects.

All contractors, architects, and engineers hired by the Park District are required to follow the ADA.
The District has instituted the practice to train parks and facility staff every other year on accessibility. On years where the formal training is not held a refresher course will be available. Resources are available for staff.

Inspection checklists were updated in 2019 to incorporate ADA guidelines to monitor the District's properties to ensure that parks and facilities are accessible to all users.
