Group Ex Class Descriptions

AMRAP

AMRAP, As Many Rounds As Possible, is a super-straightforward workout format. AMRAP consists of a full body set of exercises performed in a set time with rest and repeat. The purpose of AMRAP circuit training is to master exercise, perform to fatigue, and maximize results.

Aqua Fit

Challenge the dynamics of your aqua workout with low-impact segments of cardio and resistance training using intervals and water approved equipment. Improves all areas of physical fitness, including muscle toning, cardiovascular conditioning, and flexibility.

Aqua Zumba

Integrating the Zumba formula and philosophy with traditional aqua fitness disciplines blending it all together into a safe, challenging, water-based workout that's cardio-conditioning, body-toning, and fun.

Barre

Barre combines elements of core work, Pilates, yoga, and ballet. Its low-impact isometric movements target and tone the toughest areas of your body. Your heart rate will go up and down depending on how hard you work.

Cardio Express

Start or end your workouts with a 30-minute calorie burn mix of low-impact aerobic and kickboxing exercises. Add this into your routine for improved cardiovascular endurance.

This interval class is designed to boost metabolism and fat burning potential. A variety of strength equipment and steps are used to build lean muscle mass and elevate the heart rate. The cardio intervals consist of kickboxing moves, plyometrics, and other movement combinations.

Circ-HIIT

The purpose of this style of training is to get the most bang for your buck in strength and cardio exercises. Circuit training is popular because it is the most time-efficient way to perform a full body workout. With little to no rest, you can complete the workout in a shorter amount of time than you would perform each exercise one at a time.

Cycle Rhythm

This is a high-performance rhythm-based class that focuses largely on the beat of the music. This usually includes higher energy songs with build-ups and clear beat drops. Consoles may be used but mainly for the purpose of setting time expectations and monitoring RPM.

Cycle Power / Cycle Power & Core

Experience Stages Studio Pro Interactive Group Color display where technology meets the thrill of the ride. This technology levels the playing field and everyone rides to who they are. Get ready to let the color motivate you to your best performance. Cycle Power & Core is an express version with a mat core finisher.
